INTERIM REPORT OF THE MEDICAL OFFICER  
OF HEALTH FOR THE YEAR 1942.

---

August, 1943.

TO THE CHAIRMAN AND MEMBERS OF THE  
URBAN DISTRICT COUNCIL OF WHITEFIELD.

Gentlemen,

I have the honour to present the fourth interim report on the health and sanitary conditions of the District. The report is confined to essential and urgent matters which have affected the Public Health during the year.

SECTION A—GENERAL SUMMARY.

There has been no change in the general provision of health services for the district.

Continued progress has been made in diphtheria immunisation. By the end of the year sixty per cent. of the children under five years of age and eighty-two per cent. of those between five and fifteen years of age had been protected against diphtheria. Not one case of diphtheria occurred during the year.

A birthday card scheme has been instituted and is working successfully. The health of the inhabitants has been remarkably good throughout the year.

Table I. - STATISTICAL SUMMARY.

Area—3,261 acres.

Population—Registrar General's estimate of:—

resident population mid 1942 ... 11,890

No. of inhabited houses, according to Rate Books at the end of 1942—4,169.

Rateable Value 1942—£78,164.

Sum represented by a penny rate 1941/42—£315.

Table II. - VITAL STATISTICS, 1942.

		Total	M.	F.	Birth-rate per 1,000 of the estimated resident population—16.3.
Live Births	Legitimate ...	189	103	86	
	Illegitimate ...	5	3	2	
	Total ...	<u>194</u>	<u>106</u>	<u>88</u>	

Still Births ... 4 3 1 Rate per 1,000 total (live and still) births—20.2.

Deaths (all ages) ... 131 66 65 Death rate per 1,000 of the estimated average population—11.0.

Deaths from Puerperal Causes :—

Puerperal Sepsis ... 1  
Other puerperal causes Nil.

Death-rate of infants under one year of age :—

All infants per 1,000 live births ... 5.1  
Legitimate infants per 1,000 legitimate live births ... 5.3  
Illegitimate infants per 1,000 illegitimate live births ... Nil.

Deaths from Cancer (all ages) ... 22  
,, „ Measles (all ages) ... Nil.  
,, „ Whooping Cough (all ages) ... Nil.  
,, „ Diarrhoea (under 2 years of age) ... Nil.

Table III. - CAUSES OF DEATH DURING 1942.

Other violent causes	...	...	...	...	...	...	1	-
All other causes	...	...	...	...	...	...	3	7
All Causes -							66	65

TOTAL ... 131.

## SECTION B.—GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA.

There has been no important change in these provisions during the year.

The following pathological and bacteriological examinations were made during 1942 :—

- (1) Diphtheria, 11.
- (2) Enteric Fever, 1.
- (3) Milk Samples :—
  - (a) Biological, 19—4 found to contain tubercle bacilli.
  - (b) Bacteriological, 17—7 found to be unsatisfactory.
  - (c) Methylene Blue, 15—9 found to be unsatisfactory.

**AMBULANCE FACILITIES.**—The Council have their own ambulance and full-time driver.

Reciprocal arrangements also exist with the adjoining Boroughs of Radcliffe and Prestwich.

762 calls for accident cases and private removals were received during the year compared with 517 during 1941.

## SECTION C.—SANITARY CIRCUMSTANCES OF THE AREA.

No changes have occurred in connection with the water supply and sewerage system.

A detailed statement of inspections by the Sanitary Inspector is appended.

## SECTION D.—HOUSING.

Defects which have been found or notified have received attention. Action was taken in respect of one house under Section XI of the Housing Act, 1936, which deals with individual unfit houses. Two houses were found to be verminous and were disinfested.

## SECTION E.—INSPECTION AND SUPERVISION OF FOOD.

### MILK SUPPLY.

- (a) Licences.—The following licences under the Milk (Special Designations) Order, 1936 and 1938 have been issued:—

Tuberculin Tested Milk	(1) Bottling .....	Nil.
	(2) Distribution .....	1.
Accredited Milk	(1) Bottling .....	Nil.
	(2) Distribution .....	1.
Pasteurised Milk	(1) Bottling .....	Nil.
	(2) Retail Distributors .....	2.

- (b) Dairies, Milk Shops.—There are 55 milk purveyors other than cow-keepers. Regular inspections of the premises were made during the year.

- (c) Farms.—There are 18 dairy farms and 275 cows in the district. All the farms in the district were inspected monthly with a view to cleanliness, lime-washing and structural condition. The cleanliness of the cows and the milkers was also watched, together with methods for sterilising the utensils, cooling, bottling and sterilising the milk.

- (d) Samples.

- (1) For tuberculous milk—19 samples—4 contained tubercle bacilli.
- (2) For bacterial content—  
17 samples—7 unsatisfactory.
- (3) Methylene Blue Test—15 samples—9 unsatisfactory.

**MEAT SUPPLY.**—All local slaughter-houses ceased to be used on Sunday midnight, the 14th January, 1940.

Because of the rationing, the meat supply and distribution became centralised and there is now very little local slaughtering. It is still very necessary to inspect meat coming into the shops.

46 lbs. were surrendered during the year as unfit for human consumption, together with a considerable number of tins of meat and other foods. Details are given in the Sanitary Inspector's Report.

**BAKEHOUSES, FOOD SHOPS, FISH FRYERS, AND MEAT SHOPS.**—Routine inspections have been made of all the above premises throughout the year. Conditions were found to be satisfactory.

#### SECTION F.—PREVALENCE OF, AND CONTROL OVER, INFECTIOUS DISEASE.

Apart from an epidemic of measles the amount of infectious disease has been very small. The measles cases were mild in character and no deaths occurred.

Table IV.

Disease	Total cases notified	Cases admitted to Hospital	Deaths
Scarlet Fever ... ..	27	21	—
Diphtheria (including membranous croup) ... ..	—	—	—

**DIPHTHERIA IMMUNISATION.**

Sessions have been held regularly at the School Clinic and on school premises when required.

A Birthday Card Scheme has been introduced so that children receive a reminder about immunisation on their first birthday. A specimen card is enclosed with this report. The scheme is working successfully.

Specially designed cinema slides in colour have been made and shown in the local cinema by kind permission of the owners.

Posters issued by the Central Council for Health Education and special ones designed in the Health Department have been exhibited in the district. The special broadcast talk by Sir Wilson Jameson, the Chief Medical Officer of the Ministry of Health, has been printed and distributed.

By arrangement with the County Council the services of the Health Visitor were utilised to visit the homes of all children under five who had not been immunised.

The Ministry of Information Committee has shown films on the subject of Diphtheria Immunisation, whilst the Headmasters and Headmistresses have continued to give full support to the scheme. Several schools have less than ten children attending who have not been immunised. This means that 95 per cent. or more of the pupils have been treated. By the end of the year 60 per cent. of the children between 1 and 5 years of age and 82 per cent. between 5 and 15 years of age had been immunised.

There has not been a single case of diphtheria during the year. The following table shows the incidence of diphtheria during the past 10 years. It is too early yet to say that this disease has been conquered, but the outlook is promising indeed.

TABLE VI.  
DIPHTHERIA.

Year	No. of Cases	No. of Deaths
1933	17	1
1934	11	Nil.
1935	14	Nil.
1936	17	2
1937	14	1
1938	51	2
1939	32	1
*1940	6	1
1941	3	Nil.
1942	Nil.	Nil.

\*Immunisation Scheme started May, 1940

Percentage of children immunised: 1—5 years—60%  
5—15 years—82%

No cases of diphtheria have occurred during the past 18 months.

**TUBERCULOSIS.**

**PUBLIC HEALTH (TUBERCULOSIS) REGULATIONS, 1940-42.—**

These Regulations require particulars of all persons of certain specified ages who have been on the Tuberculosis Register to be forwarded to the Ministry of Labour; the object is to draw the attention of the Medical Boards for enlistment in His Majesty's Forces. Several names were notified in 1942.

**SMOKE ABATEMENT.**—The regulations have been temporarily relaxed.

C. H. T. WADE,  
*Medical Officer of Health.*

SANITARY CIRCUMSTANCES OF THE URBAN DISTRICT  
OF WHITEFIELD.

Health Department,  
Town Hall,  
Whitefield.

TO THE CHAIRMAN AND MEMBERS OF  
THE URBAN DISTRICT OF WHITEFIELD.

I have the honour to present for your consideration my report on the Sanitary conditions of the district for the year ending December 31st, 1942.

During the year 1381 premises were visited 160 defects or nuisances were found and 148 abated, 128 informal notices and 12 statutory notices were served.

May I express to the Chairman and Members of the Health Committee, the Medical Officer of Health, Clerk to the Council, and Staff in general my appreciation of the valued assistance and co-operation shown to me during the year.

I am, Mr. Chairman and Gentlemen,

Your obedient Servant,

B. HODGSON,

*Senior Sanitary Inspector  
and Cleansing Superintendent.*

## HOUSING OF THE WORKING CLASSES.

### DISINFESTATION AND ERADICATION OF BED BUGS.

The following is a summary of the work which has been carried out during the year :—

1. (a)	No. of houses found to be infested	...	...	...	2
	Other houses	...	...	...	0
(b)	No. of houses Disinfected	...	...	...	2

2. Where houses are found to be infested with vermin, disinfection is generally carried out by Contractor. In minor cases the houses are treated with Sulphur or Zaldecide.

### SECTION 62, SUB-SECTION 2—HOUSING ACT, 1936.

One house was measured and certificate granted in accordance with the above Section. The number of certificates granted to date is 729.

### SECTION 11, HOUSING ACT, 1936.

Representation was made by the Medical Officer of Health in respect of one house during the year.

### INSPECTION AND SUPERVISION OF THE FOOD SUPPLY.

The duties appertaining to the supervision of the Food Supply has received careful attention throughout the year. It will be observed from the tabulated list of inspections that of the 1381 inspections made 321 were to premises where food is prepared or sold.

### MILK SUPPLY.

During the year efforts in connection with milk control have been concentrated on routine inspection of all premises where milk is produced or sold and the taking of samples.

The following samples were taken during the period under consideration and submitted for examination :—

Bacteriological	Satisfactory	Unsatisfactory	% Unsatisfactory
17	10	7	41%
Methylene Blue and Coliform Test	Satisfactory	Unsatisfactory	% Unsatisfactory
15	6	9	60%
Biological	Negative	Positive	% Positive
19	15	4	21%

It will be seen from the 32 samples examined that 16 failed to pass the test, or 50% of the samples taken were below the recognised standard laid down for clean milk.

The above results have been the cause of great concern to the Department and on investigation being made one has been confronted with the question of lack of labour to carry out the necessary requirements nevertheless I am convinced that if some farmers can still maintain pre-war conditions there is no reason why others cannot. In one instance it was found necessary to call one farmer before the Public Health Committee due to samples taken at his farm not being up to standard, arising out of such interview later samples were satisfactory. I feel that in some cases due to various calls on farmers in other directions milk production is being neglected at the expense of the consumer.

#### **FOOD AND DRUGS ACT, 1938.**

The duties under the above Act are carried out by the County Public Health Department and I am indebted to Mr. J. L. Almond the County Sanitary Officer for a report of the work carried out in the district. The number of samples taken were:—27 milk and 9 other articles of food. No proceedings were instituted during the year.

#### **MEAT AND OTHER FOODS.**

15 pigs were slaughtered under licence granted by the Ministry of Food, in all cases the Local Food Office notify the Department of licenses granted and carcasses are then examined.

The undermentioned articles of food were on examination found to be unfit for food and surrendered.

32	lbs.	of Imported Beef
14	lbs.	of Forequarter and Loin of Lamb
2		Sheeps Head
26	lbs.	of Butter
6	lbs.	of Cheese
118	Tins	of milk
15	„ „	Luncheon Meat
19	„ „	Corned Beef

1	,,	,,	Tomatoes
4	,,	,,	Salmon
4	,,	,,	Herrings
25	,,	,,	Pilchards
4	,,	,,	Sardines
3	,,	,,	Plums

#### **BAKEHOUSES.**

There are 14 bakehouses on the Register 31 inspections were made during the year and upon such inspections were found satisfactory.

#### **SANITARY ACCOMMODATION.**

The following table gives details of Sanitary Accommodation in the district on December 31st, 1943.

Fresh Water Closets	3955	Dry Ash Pits	...	2
Pail Closets ...	...	Privy Closets	...	52
Dust Bins ...	...	Privy Middens	...	22
Waste Water Closets	128			

#### **PUBLIC CLEANSING SERVICE.**

The subject matter of this section of the report deals with the year ending March 31st, 1942, as distinct from the rest of the report which is for the year ending December 31st, 1941.

The work of the Department has gradually increased during the period under consideration, this increase being due to the National Campaign for Salvage.

Every effort has been made to keep before the public eye the importance of salvage, and I feel that the results achieved as shown by the tables satisfactory.

The number of Salvage Stewards on the register at the end of March was 178 as against 86 last year, thanks are due to the stewards for the valuable assistance given in increasing the tonnage of materials returned to industry.

Though the weight of materials collected can be considered satisfactory there is still room for improvement in respect of certain articles such as bones and rags and it is hoped that the public will see that these articles are handed over along with other salvage.

The following tables give details of materials salvaged with statement of receipts and expenditure.

<i>Materials.</i>	No.	T.	C.	Q.	Lbs.	£	s.	d.
